All things University of Minnesota Duluth

The Language nest is a natural expression of Anishinaabeg values. “Anishinaabeg language is focused on action and doing, and that can translate into how we live our lives. It’s about creating, and that’s a good principle for living. The language takes us out of passive modality. Things have been done to us, but our language tells us that we are always in action, and that we create who we are. We all have things done to us, but it’s how we react that matters,”
