If you are looking for a way to streamline your lending and borrowing workflow, consider implementing the use of OCLC's Knowledge Base (KB). By linking your online resources to OCLC's database, you will be able to take advantage of its powerful features, including:

**Borrowing:**

- The Knowledge Base will find and stops outgoing direct requests when your library owns the full text electronic resource.
- It can help you more accurately choose lenders that are able to fill your request using electronic resources by linking to their KB information.

**Lending:**

- Links to electronic resources your library owns, and you can add licensing information so you will know immediately if that title allows use of that resource for ILL.

To learn more, check out OCLC's [website](#) and sign up for training.
